**INVENTOR'S DECLARATION PURSUANT TO RULE 1.131**

Sir:

The undersigned Declarant does declare as follows:

1. I am the named inventor in the above-referenced patent application.
2. I invented the subject matter set forth in the claims of the above-referenced application prior to the asserted date of the applied art, namely, circa July 2001.
3. Attached is a true and correct copy of the invention disclosure for the invention that became the above-referenced patent application, showing a date of receipt of June 1, 2001.
4. In fact, the invention set forth in the claims of the above-referenced application was conceived before June 1, 2001.

5. The undersigned acknowledges that willful false statements and the like are punishable by fine or imprisonment or both (18 USC 1001) and may jeopardize the validity of the application or any patent issuing thereon.

6. All statements made by the Declarant's own knowledge are true and that all statements made on information and belief are believed to be true.

It is important to provide accurate and detailed information on this form. The information will be used to evaluate your invention for possible filing as a patent application. When completed and signed, please return this form to the Legal Department at JF3-147. You can submit electronically via e-mail to "invention disclosure submission" if all of the information is electronic, including drawings and supervisor approval. If you have any questions, please call 264-0444.

8. Is this invention related to any other invention disclosure that you have recently submitted? If so, please give the title and inventors: No

**PLEASE READ AND FOLLOW THE DIRECTIONS ON  
HOW TO WRITE A DESCRIPTION OF YOUR INVENTION**

Please attach a description of the invention to this form and include the following information:

1. Describe in detail what the components of the invention are and how the invention works.
2. Describe advantage(s) of your invention over what is done now.
3. YOU MUST include at least one figure illustrating the invention. If the invention relates to software, include a flowchart or pseudo-code representation of the algorithm.
4. Value of your invention to Intel (how will it be used?).
5. Explain how your invention is novel. If the technology itself is not new, explain what makes it different.
6. Identify the closest or most pertinent prior art that you are aware of.
7. Who is likely to want to use this invention or infringe the patent if one is obtained and how would infringement be detected?

The fundamental concept is to enhance a Personal Information Manager (PIM) via address inconsistency check. This would include the integration of continuity checking for:

Geography: Street, City, State, and Country

Postal: ZIP

Phone: Area Code

The status quo does not check for inconsistencies.

This concept provides value to Intel as yet another background task, which consumes CPU cycles while delivering added value to the user. Most checking may be based upon local files while street checking may be delegated to a "connected" task. Additionally this concept would be of value to Microsoft and may increase dependence upon the Internet for updates or street information.
